Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 September 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Claims 1-32 and 34 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 33 is rejected under 35 U.S.C. 102(b) as being anticipated by Mori et al. (US#5187887).

4. Mori discloses a labeling device H in Figs. 1-4 comprising: a sign plate 1 that includes a flat front surface with indicia 9 thereon; and a saddle fitting 2-5 integrally molded to (col. 4, lines 49-54) and below the sign plate, wherein an inside diameter of the fitting is shaped as a section of a circle having a gap 4 less than 180 degrees.

5. Mori discloses the device being used in conjunction with a circular wire D having an outside diameter and axial length wherein when applied thereto, the inside diameter of the saddle fitting is equal to or slightly smaller than the outside of the wire and the inside diameter of the saddle fitting is in contact with the outside diameter of the wire. Although Mori discloses the device being used in conjunction with a circular wire as opposed to a circular pipe, tube, or conduit, the applicant is reminded the circular pipe, tube, or conduit is not being positively

claimed and thus represents the intended use of the invention. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). In this case, the labeling device is capable being used in conjunction with a circular pipe, tube, or conduit as claimed by the applicant.

Response to Arguments

6. Regarding the election of species requirement made FINAL in Paper No. 10, the applicant argues the examiner has failed to discuss an alleged disclosed relationship between species as required per MPEP 808.01(a). The examiner did not discuss a relationship between species because there is no relationship. Each previously identified species clearly includes patentably distinct structure, i.e. the species are not obvious variants of each other. Further, the applicant argues claims 1, 29, and 32 read on the elected species, namely Fig. 14, as the device shown in Fig. 14 could contain a saddle stem. The examiner disagrees as page 13, lines 12-18, of the specification of the instant application clearly states a particular purpose of the Fig. 14 labeling device not including a saddle stem. The applicant is reminded the election of species requirement is petitionable under 37 CFR 1.144.

7. Applicant's arguments with respect to Clement (US#4844000) have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3677

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
